

The newest fun weak signal digital mode.  
Shaun Harteloo, N7TNP Amateur Extra

**FT-8**

# What is FT8?

- ① The latest weak signal mode from K1JT
- ① Joseph Taylor, K1JT
  - Nobel Prize winning Astrophysicist
  - Created WSPR, JT65, JT9 and many other Weak signal modes
- ① WSJT (Weak Signal/Joseph Taylor)
  - WSJT, WSJT-X, WSPR, SimJT
  - <https://physics.princeton.edu/pulsar/k1jt/>
- ① I've made 1000+ contacts since Jan 2018
  - Completed my WAS on 20m

# What is FT8?

- First showed up in August 2017
  - As of Dec 31<sup>st</sup> ClubLog reported that 60% of all contacts logged on their service were done with FT8
- Can only be found in WSJT-X and some other free software packages.
- Time Dependency
  - Synchronized time is critical to this mode working properly
- 15 Second Transmission Intervals
  - Even (0 Second/30 Second)
  - Odd (15 Second/45 Second)
- 13 Character Limit
- Can decode down to audio levels of -24 dB

# What is FT8?

- “[FT8 is] designed for making reliable, error-free contacts using very weak signals — in particular, signals that may be too weak for the more traditional modes to be usable, or even too weak to hear.” -Joseph Taylor, K1JT

# What is needed?

- ⦿ Computer
- ⦿ Audio Interface to Radio
  - Signalink
  - West Mountain Radio RigBlaster
  - Timewave Navigator
  - Homebrew
    - WSJT-X requires an audio card that does 48000hz sample rate
- ⦿ Time Synchronization Software
  - Dimension 4 - <http://www.thinkman.com/dimension4/>
  - Meinberg NTP - <http://www.satsignal.eu/ntp/setup.html>
- ⦿ WSJT-X
  - <https://physics.princeton.edu/pulsar/k1jt/wsjt.html>

# Time Synchronization

## Why?

- Computer clocks don't keep time very well
- They lose 10ths of a second very quickly

## FT8 is highly time sensitive

- Decodes will fail starting at a DT difference of just 0.5 seconds.
- Ideally you are within 0.1 seconds.

UTC	dB	DT	Freq	Message
234315	-15	1.0	1431 ~	KI6DY NP4G -13
234315	-20	0.1	1871 ~	WA4MIT JH3VWN 73
234315	-8	0.2	2141 ~	K6SEX JP7DKQ -13
234315	-14	0.2	2308 ~	VE6DDD K3UA EN90

# How to make an FT8 QSO

- ◎ 15 second cycles
  - 4 Per Minute
  - 2 Listen
  - 2 Transmit
  - 13 seconds on the air
  - 2 seconds for decoding and preparing for the next cycle
- ◎ Similar to JT65 and JT9
  - FASTER!

# How an FT8 QSO Operates

# FT8 for Field Day and other Events

- We worked FT-8 for Field Day
- The challenge: Figuring out the most efficient way to send the FD exchange.
  - '3A OR'
  - We used the 'TX Macro Configuration'
  - 3A OR 73 W7Q
  - {CAUTION} Limit of 13 characters

# FT8 DXpedition Mode

- ⦿ Allows a 'Fox (DX)' to work multiple stations at once
  - Really good for working DX stations
- ⦿ 'Hounds (Hunters)'
- ⦿ You generally don't see people running DXpedition mode on the known FT8 frequencies.

# FT8 On The Go

- ① I use remote desktop applications to work FT8 away from the shack.
  - Chrome Remote Desktop
- ② Things to think about before remote hamming
  - Good Antenna System
  - Good Internet Connection
  - Security
- ③ Things I need buy to enhance my remote station
  - Computer readable SWR meter
  - Remote capable antenna switch
